Soft Skills: Communication, Teamwork, Problem-solving, Time management

EXPERIENCE

Full Stack Developer

Mar/2025 - Present

Cygnis Media, Karachi

- Currently serving as a Full Stack Developer at a leading custom web development company specializing in intelligent software solutions.
- Working on building cutting-edge web applications and AI-powered software solutions that drive digital transformation.
- Focusing on delivering scalable, enterprise-grade solutions using modern technologies and best practices.

MERN Stack Developer

Aug/2024 - Mar/2025

Technoholic Advanced Solutions, Karachi

- Worked on frontend and primarily focused on backend of large applications, integrating third-party APIs to enhance functionality and performance.
- Collaborated with development team to improve productivity and optimize application performance.
- Introduced innovative solutions that increased user satisfaction and mentored junior developers.

Junior MERN Stack Developer

Sept/2023 - Aug/2024

Cyphion, Karachi

- Developed responsive web applications using React and Express, enhancing user interaction and performance.
- Collaborated with team to refine code, reduce bugs, and speed up project delivery.
- Led end-to-end development, introducing solutions that improved product functionality and user satisfaction.

Backend Developer Intern

Apr/2023 - Aug/2023

Teknoloje Solutions, Karachi

- Developed backend APIs with MongoDB, improving application performance and scalability.
- Implemented security measures, including authentication and authorization, to protect user data.
- Promoted continuous learning and team collaboration by staying updated on Node.js trends and sharing insights.

PROJECTS

Spaderent: Spaderent is a comprehensive property management software solution offering streamlined property oversight, tenant management, and automated operations. I developed the responsive frontend interface, scalable backend architecture, and integrated secure payment processing APIs for seamless rent collection and property management operations. [Visit](#)

Prime Tuition: I spearheaded the design and development of an admin panel for managing educational content and interactions. [Visit](#)

Digital Tenant: Digital Tenant is an advanced tenant-focused property management platform providing automated rent collection, maintenance requests, and tenant communication features. I architected the full-stack solution with React.js frontend, Node.js backend, and MongoDB database, implementing real-time notifications and mobile-responsive design for optimal tenant experience. [Visit](#)

Softlogic: Softlogic is a service provider app offering diverse services. I developed its responsive design, scalable backend, interactive frontend, and secure APIs. [Visit](#)
